

HASHICORP CERTIFIED: TERRAFORM ASSOCIATE

Benvenuti in questo corso di preparazione all'ottenimento della certificazione "HASHICORP CERTIFIED: TERRAFORM ASSOCIATE".

Alcuni dettagli relativi all'esame:

Assessment Type	Multiple choice
Format	Online proctored
Duration	1 hour
Price	\$70.50 USD, plus locally applicable taxes and fees. Free retake not included .
Language	English
Expiration	2 years

HASHICORP CERTIFIED: TERRAFORM ASSOCIATE

Di seguito gli argomenti richiesti ai fini della certificazione che coincidono esattamente con gli argomenti presenti all'interno di questo corso.

Per ognuna delle sezioni, saranno forniti degli approfondimenti sia teorici che pratici, così da rendere ogni concetto quanto più chiaro possibile.

Ogni sezione è comprensiva dei relativi sottocapitoli, anche questi saranno oggetto del corso.

HASHICORP CERTIFIED: TERRAFORM ASSOCIATE

Understand Infrastructure as Code (IaC) concepts:

- **Explain what IaC is.**
- **Describe advantages of IaC patterns.**

HASHICORP CERTIFIED: TERRAFORM ASSOCIATE

Understand the purpose of Terraform (vs other IaC):

- **Explain multi-cloud and provider-agnostic benefits.**
- **Explain the benefits of state.**

HASHICORP CERTIFIED: TERRAFORM ASSOCIATE

Understand Terraform basics:

- **Install and version Terraform providers.**
- **Describe plugin-based architecture.**
- **Write Terraform configuration using multiple providers.**
- **Describe how Terraform finds and fetches providers.**

HASHICORP CERTIFIED: TERRAFORM ASSOCIATE

Use Terraform outside the core workflow:

- Describe when to use terraform import to import existing infrastructure into your Terraform state.
- Use terraform state to view Terraform state.
- Describe when to enable verbose logging and what the outcome/value is.

HASHICORP CERTIFIED: TERRAFORM ASSOCIATE

Interact with Terraform modules:

- **Contrast and use different module source options including the public Terraform Module Registry.**
- **Interact with module inputs and outputs.**
- **Describe variable scope within modules/child modules.**
- **Set module version.**

HASHICORP CERTIFIED: TERRAFORM ASSOCIATE

Use the core Terraform workflow:

- Describe Terraform workflow (Write -> Plan -> Create).
- Initialize a Terraform working directory (terraform init).
- Validate a Terraform configuration (terraform validate).
- Generate and review an execution plan for Terraform (terraform plan).
- Execute changes to infrastructure with Terraform (terraform apply).
- Destroy Terraform managed infrastructure (terraform destroy).
- Apply formatting and style adjustments to a configuration (terraform fmt).

HASHICORP CERTIFIED: TERRAFORM ASSOCIATE

Implement and maintain state:

- Describe default local backend.
- Describe state locking.
- Handle backend and cloud integration authentication methods.
- Differentiate remote state backend options.
- Manage resource drift and Terraform state.
- Describe backend block and cloud integration in configuration.
- Understand secret management in state files.

HASHICORP CERTIFIED: TERRAFORM ASSOCIATE

Read, generate, and modify configuration:

- **Demonstrate use of variables and outputs.**
- **Describe secure secret injection best practice.**
- **Understand the use of collection and structural types.**
- **Create and differentiate resource and data configuration.**
- **Use resource addressing and resource parameters to connect resources together.**
- **Use HCL and Terraform functions to write configuration.**
- **Describe built-in dependency management (order of execution based).**

HASHICORP CERTIFIED: TERRAFORM ASSOCIATE

Understand Terraform Cloud capabilities:

- **Explain how Terraform Cloud helps to manage infrastructure.**
- **Describe how Terraform Cloud enables collaboration and governance.**

HASHICORP CERTIFIED: TERRAFORM ASSOCIATE

TERRAFORM DOCUMENTATION

Per qualsiasi dubbio o concetto che non fosse sufficientemente chiaro, fare **SEMPRE** riferimento alla **DOCUMENTAZIONE UFFICIALE** di Terraform:
